

I am against allowing multiple ownership by any corporation of radio and/or TV stations in a city. I cannot believe that the FCC can claim that the public interest can possibly be served when all news outlets in a local area are controlled by the same corporation or owners. Our very democracy is at stake if only a few huge corporations control most of the news our citizens view. I strongly urge the FCC to not only NOT allow increased ownership of broadcast outlets in a given area, but to DECREASE the number of stations that can be owned by any entity so that only ONE radio and ONE TV station in a given area can be owned by the same corporation or owner group! This will increase the views presented to the public and allow the public more choice in news sources.
